CATHODIC PROTECTION

IRREGULAR PROFILES

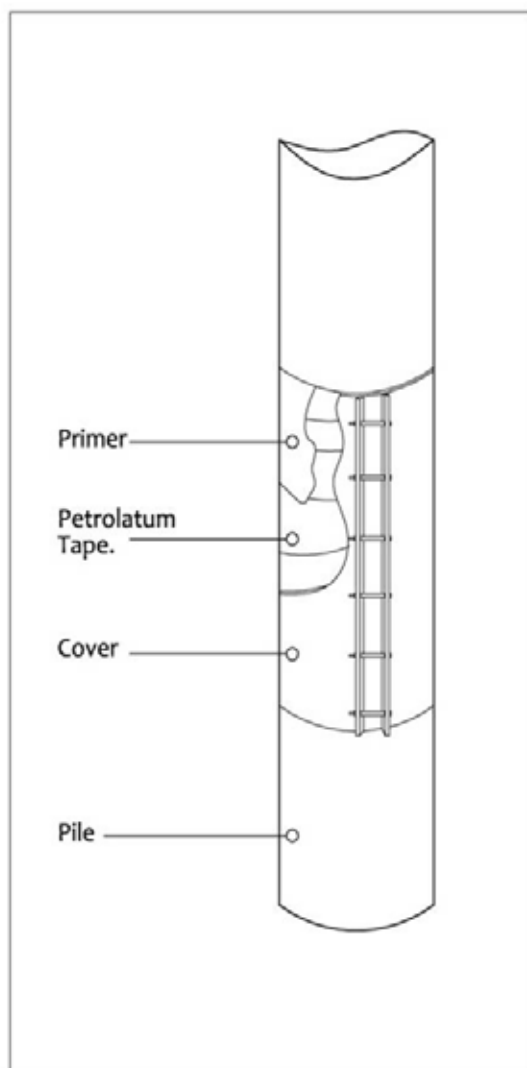

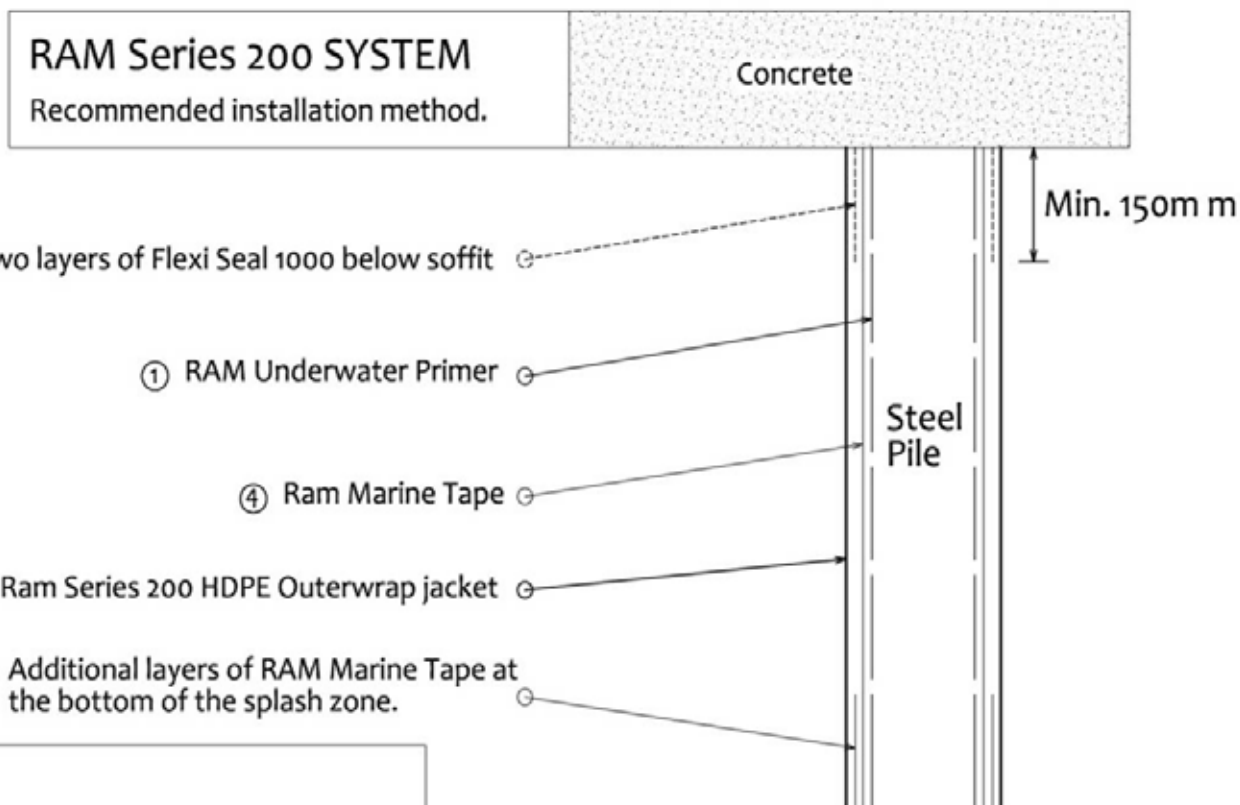

HP PILES

AIWC RAM Marine Systems on and off Shore Corrosion Prevention:

The unique AIWC welded collar design of the HDPE bars allows the jacket to tighten on any regular or irregular substrate. The welded bars are stronger than the actual parent material.

Installation Guide

INSTALLATION PROCEDURE.

- 1- Clean the steel pile surface in accordance with SSPC-SP2 or SP3.
- 2- Hand apply a layer of RAM UNDERWATER PRIMER to steel pile surface.
- 3- Use RAM MASTIC to fill badly corroded and pitted surfaces if necessary.
- 4- Apply RAM Marine Tape spirally at 55% overlap from the bottom to top of splash zone, with additional tape applied at the bottom most of splash zone to enhance support to jacket.
- 5- Apply two layers of Flexi seal 1000 at min. 150mm below the concrete soffit.
- 6- Outerwrap with RAM Series 200 HDPE jacket and secure with bolted system.
