The One Stop Shop

Australasian Industrial Wrappings and Coatings (AIWC) began operations in 1998, manufacturing and distributing petrolatum tapes, bituminous tapes and heat shrink sleeves.

Soon after entering the Australian pipeline industry, the team at AIWC noticed that the market needed a dependable supplier of various materials, including anti-corrosion prevention coatings, for the construction and maintenance of pipelines, and set about the company to fulfil this need.

Over the years, AIWC had gradually expanded the range of products it offers customers, and have now established themselves as a “one– stop – shop”, stocking everything required by pipeline owners and builders.

AIWC has supplied numerous projects for well established companies in the Australian market. Such as Agility Gas Networks, Caltex Refineries, Sydney Gas, Jemena, Shell Refinery, Sydney Water as well as high profile projects such as the SEA Gas pipeline and the Telfer pipeline.

The company draws on experience of their technical staff who have years of experience in specifying, supplying, supervising and undertaking works to achieve cost effective, long term benefits for all clients, for both major and minor works.

AIWC are not limited to just pipelines, as they have also excelled in the supply and installation of pipe wrapping systems and impressed current cathodic protection systems for marine use.

AIWC is a 100 per cent Australian owned company, and all petrolatum products are 100 per cent Australian made. AIWC is constantly increasing its range of products and services, proving its depth and reliability to deliver on time and at a reasonable price.

RAM Petrolatum Tapes

RAM Petrolatum Tape Systems utilize microcrystalline waxes which achieve excellent characteristics including high confirmability, superior adhesion / amalgamation to itself and substrate and finally very user friendly. RAM Petrolatum Tapes can accommodate all conditions including U.V, Marine, Petro Chemical, High abrasion areas etc.

Flexi Seal Butyl Tapes

The Flexi Seal ranges of tape coatings have unique quantities which sets the FLEXI SEAL TAPES apart from all the others.

Flexi Seal can be applied by hand application or by machine.

Flexi Seal tapes are the best solution for the coating of pipelines when only Butyl Tapes will do.

Zanelli Heat Shrink Sleeves

Zanelli Heat Shrink Sleeves are a robust and tolerant sleeve which does not require any pre heat (compared to others) to achieve a uniform constant coating over the substrate.

Zanelli HSS have been in Australia for over forty years and are accepted worldwide due to its exceptional performance.

Corrosion & Water Proofing Solutions

WATER PROOFING SYSTEMS

AIWC have supplied a wide range of 1 pack and 2 pack Polyurethanes, Silicones, Torch on Membranes, Peel & Stick Membranes, Solventless Epoxies and Grouts to the construction industry since 1998.

MARINE COATINGS

AIWC have numerous systems designed for preventing corrosion on steel piles. These include the traditional Petrolatum Tapes with outer claddings comprising of Bituminous Tapes, UVR HDPE Jacket with straps, and also an innovative bolt on jacket system.

STRUCTURAL STEEL

Cathodic Protection Products

AIWC can design, supply and even install your sacrificial or impressed current cathodic protection system.

Anodes and Electrodes

AIWC has been supplying sacrificial anodes for over 15 years, over that time we have produced thousands of unique anodes for special purpose applications. We have the facilities to create any shape or size.

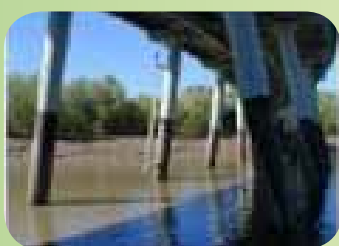

Insulating Joints and Gaskets

Monolithic Insulating Joints are used to electrically isolate pipeline segments. Monolithic insulating joints are used for the sectioning of main pipelines (gas, oil and water) and service lines. The joints ensure cathodic protection and electrical safety in pipelines.

Coke Breeze Back Fill

Carbonaceous Backfill also known as Coke Breeze is calcined carbon. It is used to surround impressed current anodes to improve the efficiency of the anode.

Cathodic Protection System

The aim of all cathodic protection systems is to reduce the rate of corrosion of the cathode by promoting the flow of electrons from the active anode to the passive cathode.

Our range of pipeline test points and supporting pipeline test point equipment

Insulating Gasket Kit

Insulating flange kits include: gaskets, and either insulating sleeves and washers or moulded one piece sleeve and washer – also called 'top hats'.

Pipeline Equipment

AIWC's philosophy of providing high quality products & services, whilst achieving practical deadlines has lead the way into a reliable one stop shop for pipe liners.

AIWC have supplied numerous projects over the years providing an invaluable one stop shop to the pipeline contractor. So whatever your requirements are, **AIWC can supply practically anything from a socolet through to installing an impressed current cathodic protection system.**

Registration Certificate

This document certifies that the administration systems of

AIWC

Australasian Industrial Wrappings and Coatings Pty Ltd

Unit 10/7 Lyn Parade, Prestons, New South Wales, 2171

*have been assessed and approved by QAS International
to the following management systems, standards and guidelines:*

ISO 9001 : 2008

With the permitted exclusion of clause 7.3 Design and Development

The approved administration systems apply to the following:

Manufacturer of corrosive prevention material for pipeline and marine equipment.

Original Approval **17th October 2011**.....

Current Certificate **17th October 2011**.....

Certificate Expiry **17th October 2012**.....

Certificate Number **AU1247**.....

On behalf of QAS International

www.qas-international.com

This certificate remains valid while the holder maintains their quality administration systems in accordance with the standards and guidelines stated above, which will be audited annually by QAS International.

The holder is entitled to display the above registration mark for the duration of this certificate.

This certificate must be returned to QAS International on reasonable request.
