

TECHNICAL DATA SHEET

RAM Hi-Temp Outerwrap Tape

DESCRIPTION

The **RAM Hi-Temp Outerwrap** is a flexible, UV stable and highly conformable PVC coated with an aggressive rubber adhesive.

The **RAM Hi-Temp Outerwrap** is smooth and consistent to unwind at a variety of temperatures.

The RAM HT Outerwrap is unyielding to moisture, acids, alkalis and salt solutions.

USES

Recommended for industrial identification and colour – coding, or pipe wrapping purposes.

CHARACTERISTICS

The **RAM Hi-Temp Outerwrap** is a plasticised PVC film coated one side with a natural rubber-based pressure sensitive adhesive.

- Colour: Black.
- Thickness: 0.20 mm min.
- Length: 30m Roll.
- Widths: 50mm, 100mm, 150mm. Other sizes are available.

APPLICATION

The **RAM Hi-Temp Outerwrap** should be used over the RAM Petrolatum tapes to provide mechanical protection, to stop the ingress of moisture and soil to the RAM Pet tapes.
